

REPORT TO PARENTS OF CHILD SCREENED AT DAY CARE INSTRUCTIONS

PURPOSE

This form should be sent to the parent(s) of a child who did not have a normal vision screening when the Nursing Eye Care Consultant screened the child at a day care center. It provides information about the reason the NECC is concerned about the child's vision and urges the parent(s) to take the child for a thorough eye examination. An eye care provider can then use it as a reporting document to return to the NECC.

INSTRUCTIONS

1. The NECC should write the child's name in the space provided at the top of the form.
2. The NECC should indicate with a "X" any of the findings of the vision screening.
3. The NECC should sign the form at the middle of the page. A business card and return envelope of the NECC should be included with the report to enable both the family and the eye care provider to make contact with the NECC as needed.
4. The lower half of the form should be completed by the eye care provider and returned to the NECC. Any recommendations on the form should be acted upon appropriately by the NECC and then filed with the screening records
